

May 27, 2025

Report of the ICLA Structures Committee for 2024-25.

The Structures Committee reviewed the AILC/ICLA's statutes at the President's request and proposed several revisions. These were discussed and voted upon at the online EC Meeting on March 2, 2025. The SC Chair liaised with the Chair of the Research Development Committee regarding a template for research committees' by-laws to harmonise the phrasing with the proposed changes to the statutes. The Chair also corresponded about a suggested change to the composition of the ballot, which was referred to the Structures Committee because it involved changing the Statutes. However, the proposal was dropped by the proposer due to unforeseen consequences.

The present members of the Committee are:

Anne Tomiche (France)

Noriko Hiraishi (Malaya/Japan)

Márcio Seligmann Silva (Brazil)

Liedeke Plate (The Netherlands), chair

According to the Committee's by-laws, the Committee will be constituted anew after the 2025 elections and Congress. The incoming President will appoint a chair of the Committee, who will then select the other members of the Committee, at least three, in consultation with the President.

Respectfully Submitted,

Liedeke Plate, Committee Chair

Professor of Culture and Inclusivity, Radboud University
